The architect is preparing a report.

We are in the process of reviewing your renovation as well as 6B's work

There also seems to be an issue with make up air due to the windows having been changed and there being a severe reduction in make up air.

When you have this smell I would recommend that you open a window slightly

Subject: Food smell getting more frequent

Paul,

The food smell is back again. I'm out of town but Sam says it smells like some type of stew or sauce. It's almost 10 pm and the smell started around 8 ish.

We also had food smells on Friday night that we told Walter about. And we also had to open the windows on Saturday night to deal with the food smells.

This problem is getting worse. I don't know if the cold weather is making it worse or if 6B is cooking more but this is becoming unbearable. Having to open our windows when it's 20 or 30 degrees out because we are desperate to reduce the food smells in our bedrooms is unhealthy for us and our children.

You saw all of the steps we've taken to mitigate this problem. What is the co-op going to do to address this?
